WHO I AM

I'm a web developer working in New York City. My abilities are spread across the full stack, but my primary focus is on the front end. Prior to entering the software industry, I was an artist and designer, and have a keen eye for crafting elegant user interfaces.

RELEVANT EXPERIENCE

● **FULL STACK DEVELOPER** Tradelt, Inc. | May 15 - current

Helped build and grow the Tradelt product. Tradelt provides API technology that securely and easily enables partner apps and sites to integrate account aggregation and equity trading with major US retail brokers.

Client Libraries

- Build and maintain a JSON API for sending trade requests to the Tradelt multi-broker order and portfolio management system.
- Build and maintain pre-built web trading widgets that partners can integrate into their page.
- Build and maintain an iOS library that partners can use to integrate trading and portfolio functionality within their app.

Multi-Broker Aggregation

- Build and maintain connectivity with most major US retail brokers to handle in real time authentication, order management and portfolio management.
- Build and maintain an aggregation framework that dispatches requests among different brokers and normalizes results into a common interface.

● **FULL STACK DEVELOPER** Kapitall, Inc. | Mar 14 - Sep 15

Helped build and grow trading and account management functionality for the Kapitall Brokerage Platform, utilizing both Pershing and APEX clearing brokers.

Order Management

- Built web trading ticket for Equities and ETFs.
- Built web order system for viewing, canceling and editing orders.
- Connected to Pershing, then APEX order management APIs for order execution.

Portfolio and Account Management

- Built web portfolio interface displaying account balances, cash, holdings, orders, transactions and account statements.
- Connected to the Markit On Demand portfolio engine APIs to retrieve portfolio data as well as portfolio analytics in real time.

● **PRODUCER & JUNIOR WEB DEVELOPER** Disney Interactive | Oct 10 - Feb 14

Helped with content production efforts for various creativity-focused digital products.

- Led QA testing and consumer feedback for the Disney Create portal and two iOS apps, Pixel'D and Kerpoof: Tell A Story.
- Built and maintained a web based, internal task management tool for the content moderation team.

EDUCATION

Memphis College of Art | Aug 04 - May 08

Memphis, TN
Bachelor of Fine Arts, Painting

Overton High School | Aug 00 - May 03

Memphis, TN
High School Diploma
